

## *Tame the complexities of security compliance*

Cybera's **SECURE|LINK** Enhanced PCI Security Bundle makes security and compliance affordable and simple! Why spend thousands of dollars on equipment for each location, tens of thousands more for enterprise infrastructure and software, and then perhaps even more per month to have outside experts manage it? With **SECURE|LINK**, at a fraction of the cost, you get all of the advanced security features you need for PCI compliance and protection from the latest security threats. Since **SECURE|LINK** is structured as a Security as a Service (SaaS) solution there are no costly capital investments at risk of obsolescence within a year or two. **SECURE|LINK** also includes Cybera's security and networking experts who fully manage your custom solution day and night.

- **Low cost** – low annualized service fees including equipment – no up front costs!
- **Fast deployment** – as few as 24 hours from order to operation!
- **Security and compliance** – stateful managed firewall, IDS, IPS, encryption, two-factor authentication, hosted UTM (AV,AS, Content Filtering), hosted SIEM, centralized logging and reporting, and security features required for PCI, HIPAA, or GLBA compliance.
- **Enhanced security options** – **SECURE|WAVE** wireless IDS, file integrity management, PCI certified gateways with all major payment processors, 3rd party application gateways, secure remote access for employees, and more!
- **Obsolescence Protection** – Through on-going development of cloud based services, remote upgradeability of **SECURE|LINK** devices and the elimination of expensive premise equipment, you no longer need to worry about falling behind in technology or stranded security investments.
- **Fully managed** – 24 X 7 X 365 monitoring with industry leading proactive management and support.
- **Simple** – Intelligent Remote Self Configuration (IRSC) for plug and play implementation.

### **SIMPLE SECURITY FOR COMPLEX REQUIREMENTS**

Cybera is a PCI Certified provider, and **SECURE|LINK** is the industry's most cost effective Security as a Service (SaaS) solution for PCI-DSS compliance. Hundreds of mid to large merchant enterprises ranging from 50 to 15,000 locations have trusted in Cybera's security expertise to help them meet and maintain PCI compliance. **SECURE|LINK** includes a specific bundle of the security features necessary to meet the PCI-DSS security requirements that relate to payment data transmission, network security and logging / retention of security information. Cybera's PCI compliance expertise has also led to growing success in healthcare and finance where specific HIPAA and GLBA security packages can also be included as part of **SECURE|LINK**.

### **COMPREHENSIVE AND INTEGRATED**

Cybera's **SECURE|LINK** is the most comprehensive suite of cloud-based security services for data security compliance. For a single low fee you can enjoy the benefits of security for all of your applications at remote locations across the enterprise. **SECURE|LINK** integrates with Cybera's **SECURE|CORE** to offer additional services including DSL or 3G/4G wireless broadband for primary access, 3G wireless or dial back up, **SECURE|WAVE** wireless IDS, secure payment gateways, private Wi-Fi, and public hotspot services. Your **SECURE|LINK** solution also includes Cybera's SCA-305 security appliance, a fully managed ICSA certified firewall and service delivery platform for each remote location.

## OBSOLESCENCE PROTECTION

Cybera is constantly upgrading and evolving its suite of hosted security applications to stay ahead of evolving security standards and threats. New security services and features can be remotely added to your solution to ensure that your **SECURE|LINK** solution is always ready to address your latest needs. With security changing so fast why make significant capital investments in hardware and software associated with multiple point security solutions? Cybera's SaaS solutions evolve to maintain pace with your requirements – to protect your compliance and security investment.

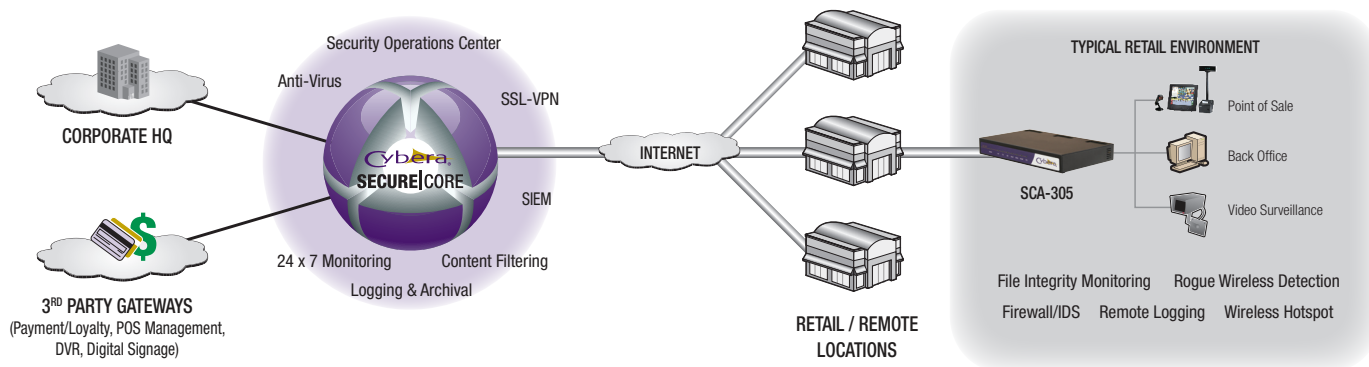

## WORRY FREE MANAGED SERVICES

**SECURE|LINK** streamlines security and network operations for superior application performance, greater uptime and lower costs. Cost saving features include automated monitoring and alerting from Cybera's 24x7 Security Operations Center and logging and reporting easily accessible through Cybera's web-based **SMART|VIEW** security portal. With a single provider and point of contact to oversee your security infrastructure, services and reporting the Cybera **SECURE|LINK** solution ensures the lowest Total Cost of Ownership (TCO) for compliance across the enterprise.

## OPTIONS FOR ADDITIONAL VALUE

**SECURE|LINK** can be enhanced through a variety of additional security and networking solutions from Cybera. Through Cybera's **SECURE|CORE** infrastructure and **SMART|VIEW** portal, customers have the power to implement and maintain compliance and security against the latest threats in the Retail, Convenience/Petroleum, Medical, Financial, Hospitality and Restaurant industries.

- **SECURE|WAVE** wireless IDS
- **File Integrity Management**
- **Secure payment and 3rd party application gateways**
- **Primary remote site connectivity (DSL, 3G/4G, etc.)**
- **Backup connectivity (3G/4G, Dial)**
- **Private Wi-Fi & Public HotSpot services**
