

PCI COMPLIANCE

WHAT YOU REALLY NEED TO KNOW

Why PCI compliance should be a top priority for every business

WHAT IS PCI?

Payment Card Industry (PCI)

The PCI Council Data Security Standard (PCI DSS) was created in 2006 by the major payment brands (American Express, JCB Co., Mastercard, and Visa).

You are subject to PCI compliance if:

You accept...

POS

transmit...

DATA IN MOTION

or store cardholder data.

DATA AT REST

Learn more at pcisecuritystandards.org

THE GOAL: A SECURE DATA JOURNEY

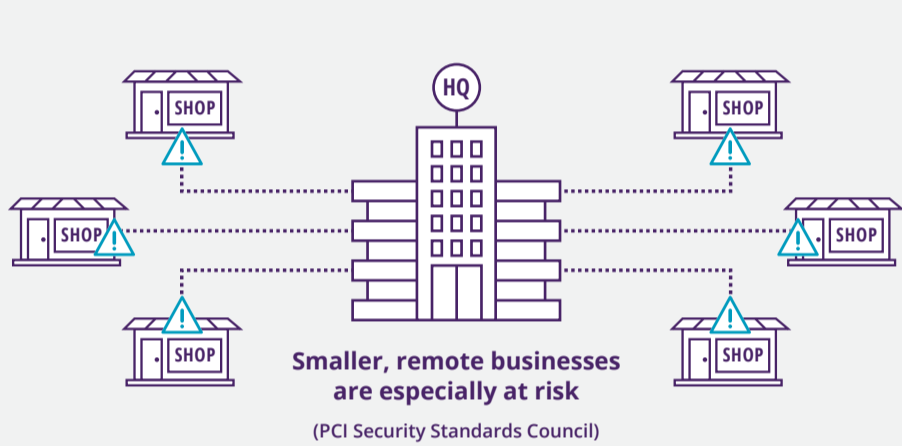

The PCI mandate is designed to secure cardholder data across its entire journey.

HOWEVER...

AND #1 RISK POINT = INSECURE REMOTE ACCESS

NON-COMPLIANCE CREATES RISK...

...AND COST

\$5,000-\$100,000 per month
Typical non-compliance fines you could face
(PCIComplianceGuide.org)

\$4,000,000
Average total cost of a data breach
(Ponemon Institute)

Typical Data Breach
~\$242/customer record compromised
197 days to identify a breach event
69 days to contain the event
(IBM Cost of a Data Breach Report 2019)

\$242,000
Cost for 1,000-record breach

5 WAYS TO PROTECT YOUR BUSINESS

- 1 Perform a vulnerability test to see where you're at risk.
- 2 Segment networks and applications to protect cardholder data.
- 3 Delete unused data to limit the scope of PCI compliance.
- 4 Continuously monitor your security and compliance strategies.
- 5 Consider working with a service provider with PCI expertise.

GET PCI-COMPLIANT WITH CYBERA

The CyberaONE™ Platform provides a secure, encrypted, and authenticated network for payment card processing, including a full suite of PCI-related services:

- A streamlined SAQ format
- Ongoing vulnerability scans
- Employee training tools
- An online portal for PCI-related activities
